

Tim Galante

Director, AIC Government Solutions

Tim Galante is a key member of the leadership team of AIC Government Solutions, a national technology expert that helps solve the challenges of “front line” state and local government agencies: first responders, criminal justice and health/human services practitioners. For over twenty years, Tim has assisted government clients in utilizing enterprise information technology to solve critical business issues. Since 2006, he has helped government agencies to share real time confidential information, to generate actionable intelligence, and to make more informed decisions as they protect our health, our nation, and our way of life.

Tim’s experience and relationships span government decision makers in the U.S. Department of Homeland Security, U.S. Department of Justice, and government agencies in Alabama, Colorado, Indiana, Kansas, Kentucky, Michigan, Nebraska, Nevada, Tennessee and Wyoming. He is a member of the NIEM Program Management Office, serving on the NIEM Communications and Outreach Committee. As well, Tim provides industry leadership and insight through his participation in the Global Information Sharing Initiative (Global) Outreach Working Group.

Tim’s expertise lies in his ability to help government agencies with successfully defining the vision and scope of business initiatives and driving the alignment of governance, funding and technology to achieve organizational goals. He assists AIC clients with staying current on business process, technology and privacy best practices as they relate to information sharing, workflow, business intelligence, analytics, collaboration, data quality management and identity / privacy management.

Prior to joining AIC Government Solutions, Tim held executive leadership positions with Sagestone Consulting, VIA NET.WORKS and MCI. He also served as an Information Technology and Communications Officer in the United States Air Force. Tim holds a degree in Government and Mathematics from Cornell University, a Masters Degree in Information Technology from George Washington University, and a Masters in Business Administration from the Stern School of Business at New York University.
